Jaafar Dahi Ali

Jr. front-end developer

About Me

I am from Syria, and I am a university student, I study Informatics Engineering, I love the field of website design. I am also interested In UX and UI design.
I always work to develop myself and learn more stuff about web development.

Career Objective

As a student in the Faculty of Informatics Engineering and a user of mobile and web applications, I have always concerned about the design of any application or website I use, how to distribute and arrange elements on the screen, how the design works on different screens, choosing fonts, colors and other components. Therefore, I really wanted to learn about the field of front-end development. I spent a lot of days and hours working hard to learn web design techniques, until I was able to convert sketches and prototypes ideas into attractive interfaces.

I am glad to apply for Front-End developer position in your company. I am seeking for an opportunity where I can launch my career and build a valuable skill set.

Education

Informatics Engineering – 5th grade

Tishreen University 2016-now
